6. Definitions

6.1 Privacy

- | In literal terms, privacy is defined as a state in which one is not observed or disturbed by other people or the state of being free from public attention
For the purposes of health and social care, privacy is very personal and means different things to different people. Therefore in order to respect people, privacy services need to be personalised as much as possible

6.2 Care Certificate

- | The Care Certificate is a set of standards that social care and health workers stick to in their daily working life. It identifies the new minimum standards that will be covered as part of the induction training of new care workers

6.3 Human Rights

- | Human rights are the basic rights and freedoms that belong to every person in the world, from birth until death. They apply regardless of where you are from, what you believe or how you choose to live your life. They can never be taken away, although they can sometimes be restricted; for example, if a person breaks the law, or in the interests of national security
These basic rights are based on values like dignity, fairness, equality, respect and independence. But human rights are not just abstract concepts, they are defined and protected by law. In Britain our human rights are protected by the Human Rights Act 1998
